1. Customers by Segment

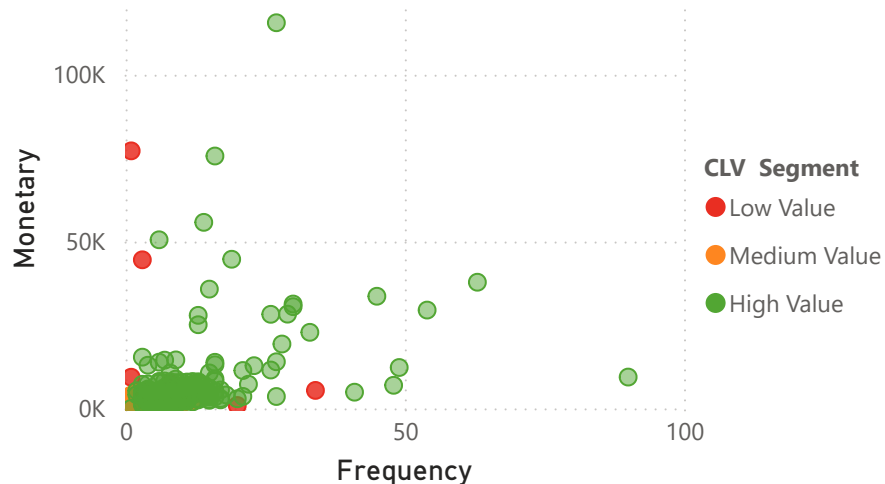

SegmentName

- At Risk / Lapsed
- Loyal Mid-Value
- New / Low Engagement
- Champions

2. Average Value by Segment

3. Customer Segments - Frequency vs Monetary

4. Top 20 Customers by Predicted CLV

CustomerID	Country	Recency	Frequency	Monetary	Predicted_CLV	CLV_Segment
	Australia					
	Austria					
	Belgium					
	Canada					
	Channel Islands					
	Cyprus					
	Denmark					
	Finland					
	France					
	Germany					
	Greece					
	Israel					

5. Model Performance & Limitations

Metric	Value
% Customers with 0 6-Month CLV	30.5%
Beats Naive Baseline	No
Model Type	GradientBoosting
Naive Baseline MAE (£)	794.10
Test MAE (£)	899.76
Test R ²	0.381
Training Date	2026-07-28

This model does not currently outperform a naive "Past spend = future spend" baseline. CLV figures should be treated as directional, not precise, especially for high-value customers.

Data Source

clv_predictions.csv
cleaned_online_retail_transactions.csv
segment_profile_summary.csv

Notes

CLV predictions are based on RFM features and a 6-month future window. Segments are defined using RFM + CLV thresholds. Monetary values are in GBP (£).

Date Range

01-Dec-2010 to 09-Dec-2011
